

PUMP SERVICE RIGS

Holt Services makes it easier for you to maximize the life of your wells and well pumps, reduce maintenance and repair, maximize efficiency, and minimize energy costs through optimal water well performance. Our pump installers and rehabilitation technicians have over 20 years of experience delivering a full spectrum of quality well and pump services.

We use pump hoists, cable tool, and dual rotary drill rigs to perform a variety of well development, well abandonment, and well rehabilitation services. Our well and pump testing services including constant rate pumping tests, step draw down testing, slug testing, water quality testing and packer testing.
